

The image features three white marble statues against a light grey background. On the left, a female figure stands with her right arm raised, holding a smaller, similar female figure. In the center, a male figure is shown from the waist up, with a bright blue plastic bag covering his head. The bag is crumpled and draped over his face and hair. The lighting is soft, highlighting the textures of the marble and the sheen of the plastic.

back to life ”*

WHO WE ARE

TBS is specialized in marble, granite, and all natural stone restoration. TBS is powered by LimeStone Egypt (Since 1975).

As a result of the quality services provided to our customers, our Marble division clients' portfolio increased to include key clients such as five-star hotels, Palaces, and big shopping malls.

TBS is committed to assist its clients to maintain their stone surfaces. With our own restoration, cleaning and maintenance R&D center, and by acquiring new technologies and up-to-date machinery, we are committed to advance restoration, polishing, floor and surface care, and cleaning techniques. Our product line provides customers with the highest quality and most cost-effective results with a deep natural shine without the necessity of using any damaging and unhealthy chemicals.

OUR MISSION

Our main mission is to provide stone restoration services that will enhance the look and value of your premises. Our goal is to make sure that you are completely satisfied with our services. TBS strives to provide its clients with quality service and unsurpassed customer support.

With an understanding of traditional building methods and more modern technical advancements, TBS is able to complete successfully the most demanding of projects. We are committed to restoring your Marble, Granite, Limestone, Travertine, Terrazzo, Mexican Tile, Onyx and all the natural Stone Floors, Walls and Counter Tops to their original factory look and feel. We also specialize in concrete cleaning. Our experts are ready to handle any stone restoration job that you may need.

We work with the same care and professionalism on every project whether it is a small- or large-scale project. From home floors, vanities, and showers to large commercial projects, everyone gets the same professional service.

**The work of art is already within
the block of marble. I just chop off
whatever is not needed.**

- Auguste Rodin

WHY CHOOSE TBS

One of the greatest advantages of hiring TBS for the job is the owner hands-on approach to each project.

We recognize the investment that you have made, whether in your home, Shop, or company, and will work with you to ensure that it will maintain its natural beauty over time. Trust our professional team to get the job done quickly, affordably and beautifully.

TBS provides an outstanding customer service, quality craftsmanship, and knowledge that only trained professionals can provide.

Our after sales team is dedicated to solving your problems and assisting your every need. Hire our team of Professionals for an hour, a day, a week, a month, or even a year, and you will get the same level of professionalism.

Residential

TBS is dedicated to delivering the same great service to our residential clients as it does to our commercial clients. For us, good customer service and quality of work is the same if it is a small private home project or a large commercial project. Our team of professionals works at a time that suits you and uses only the very best materials and machinery. Our process is comprehensive and dust free, with no fear of costly clean up jobs after our work is complete.

OUR DOMAINS

Commercial

Our attention to detail is second to none and our professional approach ensures repeat custom from all our clients. Our commercial services also cover Shopping Centers, Retail Units, Office Buildings, Apartment Lobbies, Castles, Mosques, and Hotels.

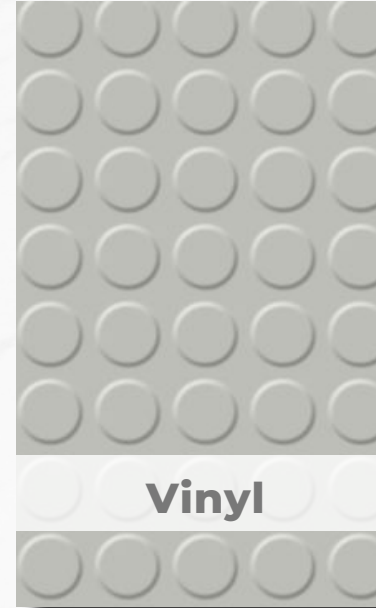

If you have commercial premises that require maintenance, or marble/stone polishing (scratch and stain removal, re-grouting orlippage removal), then TBS is the one for you.

OUR SERVICES

A close-up photograph of a person wearing a blue long-sleeved shirt. They are using a hand-held buffing machine with a white body and a silver circular buffing pad to polish a light-colored stone surface. The person's left hand is resting on the stone surface near the machine. To the right, there is a pile of small, rectangular pieces of stone or grout. The background is slightly blurred, showing what appears to be a workshop or industrial setting.

“ *TBS restores and maintains your stone,
vinyl and grout surfaces to a natural shine appearance.* ”

Marble Honing

Minimizing the type of shine you will have on the stone.

Removing all layers off the surface. Delicately grinding it with our chemical free stones achieving the desired honed finish. We then apply our impregnating sealer that soaks into the stone and forms a barrier underneath the surface that allows the stone to breathe and does not take away from the look of the surface finish.

Marble Restoration

We can achieve factory mirror finish using our state-of-the-art diamond sanding process and finishing treatment systems on any surface. TBS can restore your stone to better than its original look and luster. Our stone renewal process is the highest quality in the field and the finish is completely **natural**. There is only one way to restore your stone to factory finish and that is through our 11stage sanding process and finishing treatment system.

Our exertion comprehends working on a **mechanical** reaction technology **not chemical**, to produce and maintain a DEEP NATURAL SHINE.

Diamond Grinding

The experts at TBS use the diamond Grinding and polishing process to always ensure the most professional results. In this process, abrasive pads are used to file down the top surface of the concrete. Then, diamond-embedded abrasive pads are used to buff and polish the floor until it sparkles. Once this has been completed, the shiny concrete surface is then sealed in order to maintain the beautiful appearance and increase its durability.

Grinding & Lippage Removal

Grinding is a process we offer to remove the heaviest scratches and tile lippage from the floor. For this process we use a coarse grit diamond and we sand the floor until it is completely even. After this process, we then move up to the higher diamond level and leave the floor highly polished.

A sealing impregnator is then applied to help protect the floor and also leaves the floor slip resistant.

Tile and Grout Cleaning

Mopping only cleans the upper surface of your flooring and will push most of the dirt and grime back into the tile and grout. This will make the tile surface look weathered and dirty, and the grout will start to darken over time.

Without using specialized tile and grout cleaning equipment and methods, your tile will stay that way and will continue to worsen over time.

Granite Cleaning

Over time, the beauty of your granite can start to fade no matter how expensive the piece may be. In order to maintain the life of your granite, regular care is needed in order to keep it in the best conditions. Granite is actually formed from cooled volcanic magma. This means that any stains on your granite surface are extremely difficult to remove but not at all impossible if you hire the professional granite cleaning service at TBS.

Concrete Staining

Concrete stained floors are great flooring alternatives when you are tired of traditional carpet, tile or wood flooring. It provides unlimited coloring options including warm earthy tones and vibrant hues. Our professional concrete stain services allow you to customize the coloring of your concrete floors to match the interior of your home.

Call the experts at TBS for a concrete stain that will enhance your home and last for years to come!

Scratch and Stain Removal

Over the years, the buildup of dirt and grime on your flooring can lead to stubborn stains and scratches. Call our TBS professional Stain and Scratch Removal Services for our experts know the correct techniques and methods to efficiently and safely remove even the toughest stains and scratches from your marble and tile flooring.

1 Vacuum, mopping and stripping the surface by hand from any dirt or grease. This process leads the way to identifying all the flaws on the surface.

2 The grinding process uses metallic disks to remove any lippage and to perfectly level the surface preparing it for final finishing processes.

3 Wash, rinse, and vacuum the floor. Then use final metallic diamond disk to eliminate any deep scratches and imperfections that may affect the final look of the surface in hand.

5 This is the polishing step where we start with the resin bond diamond disk 400 Grit, 600 Grit, 800 Grit, 1200 Grit, 1800 Grit, 3500 Grit that would give the final clean natural shiny finish.

4 We start the resin bond diamond disk (50 Grit, 120 Grit - 220 Grit) that smoothens and eliminates all scratches of the surface by hand.

Results

- No Holes
- No Cracks
- No Salt
- No Humidity
- No Gaps
- Smooth and Natural Shine
- Anti-Bacterial and Hygiene

A perfect, natural, clean, shiny, eye-catching, and look-like-new surface that looks freshly installed and that would add more value to your property.
